THE PROBLEM

Your business closes deals. The gap in the middle is bleeding revenue.

80%

drop in contact rate when leads aren't
reached within 5 minutes

\$\$\$

spent on call centers and BDRs that
miss after-hours leads, holidays, and
surge volume

∞

leads sitting cold in your CRM, never
reactivated, never followed up

Most companies call back in hours — or days. By then the lead has gone with whoever called first. The math is brutal:
lose the first 5 minutes, lose the deal.

IF A LEAD ISN'T CONTACTED WITHIN 5 MINUTES

Contact rates
drop
by 80%.

That's not a marketing problem. That's a **speed problem**. And it's the single biggest leak in your revenue funnel.

INTRODUCING

A 3-Part AI Growth System that closes the gap permanently.

01

LEAD GENERATION

AI-built ads, paid campaigns, and database reactivation — net-new leads + dormant revenue.

02

AI CALLER

Voice agent that calls every lead in 60 seconds. 24/7. Books straight onto reps' calendars.

03

CRM & INTEGRATION

One dashboard. One source of truth. Every lead, call, and KPI in one place.

TIER 01

AI Lead Gen + Database Reactivation

Two parallel revenue streams from day one.

- AI-generated ad creative (Higgs Field, Arcads, HeyGen, GPT Image, Veo)
- Paid Meta + Google campaigns managed daily
- SMS + email reactivation across every dormant contact
- Lead scoring — highest-intent leads called first
- Conversion API + offline conversion upload (algorithm gets smarter every week)

AI Caller.

Calls every new lead in under 60 seconds. 24/7. 365.

- ✓ Outbound — fires within 60s of every form submit
- ✓ Inbound — answers your phones around the clock
- ✓ Handles objections trained on your offer
- ✓ Books direct onto your reps' calendars
- ✓ Logs full transcript + sentiment to your CRM
- ✓ Escalates hot leads to humans on warm transfer
- ✓ Recording + compliance baked in (TCPA / DNC)
- ✓ Daily QA loop — gets sharper every week

TIER 03

CRM Build & Full Integration

Your revenue operating system. One dashboard, one truth.

- Pipeline + stages mapped to your actual sales process
- Every lead source connected (ads, web, AI caller, manual)
- Auto-routing, auto-tagging, intelligent follow-up
- KPI dashboard — cost-per-lead, set rate, show rate, close rate, ROAS
- Works with your existing CRM — or we deploy on GoHighLevel

WHY THIS WORKS WHEN OTHER AI AGENCIES DON'T

Three layers other agencies don't combine.

01

Operator-Built Strategy

\$12M+ in ad spend managed across 50+ industries. We've already seen what works in your vertical.

02

AI-Augmented Production

Not "ChatGPT made it." Trained operators direct the AI — voice clones, video ads, copywriting, all built around your offer.

03

Done-For-You Fulfillment

No software handoff. No "you build it." We deploy, run, and optimize the entire system on your behalf.

REAL INDUSTRIES. REAL NUMBERS.

A track record across **50+ industries** and **\$12M+** in ad spend.

BEST PERFORMANCE

77X

peak ROAS achieved on a client account

Numbers are real, recent, and pulled from live client accounts. References available on request.

Strategic data partnerships most agencies can't access.

Our infrastructure runs on enterprise-grade consumer data and AI calling capacity — the engine that lets us identify, reach, and convert at scale.

280M

US-based consumers in our
proprietary database

60B+

consumer behaviors & URLs
scanned every week

95%

accuracy on full contact data
(online-to-offline matching)

20K+

AI voice agent calls placed every
day at peak

This is why our cost-per-lead and ROAS numbers don't look like everyone else's. We're not bidding for the same audiences — we're targeting the right people with verified data.

LIVE AD ACCOUNTS

Real campaigns. Real receipts.

Screenshots pulled directly from live client ad accounts — not stock imagery.
